## EDUCATION

---

**Nankai University (NKU)**

*B.S. in Computer Science*

**Tianjin, China**

*Expected Graduation: June 2022*

## INTERESTS

---

- Machine Learning, Data Mining, Computer Vision, and GNN.
- Quantitative Biomedical Science and Medical Image Processing.

## EXPERIENCE

---

**Graphology Analysis Using Computer Vision Methodology**

*Team leader*

**NKU, Tianjin China**

*May 2020 - June 2021*

Built a model that can output one's personality traits by analysing their handwriting images.

- Collected the first Chinese graphology dataset.
- Designed algorithms to extract 59 handwriting features.
- Deployed the model on a local company for better human resources management.
- The [paper](#) is under review (AAAI 2022)

**Clinical Corneal Topography Pattern Recognition**

*Technical representative from CS department*

**Tianjin Eye Hospital, Tianjin China**

*Mar. 2021 - Ongoing*

Our goal is to develop an automatic model to predict the effectiveness of orthokeratology lenses, collaborating with Tianjin Eye Hospital and School of Medicine of Nankai University.

- Recommended the technical methodology taken by the team.
- Investigated how diagnosis being made in the hospital and distilled the rules into pseudo-code.
- Extracted 3 crucial features and designed classifiers.

**Skin Disease Classification and Retrieval Model**

*Research assistant*

**NKU, Tianjin China**

*Mar. 2021 - May 2021*

Built an retrieval model to make skin disease prediction.

- Built a classification model with Pytorch and enlarged the dataset.
- Developed the front end of the demo.
- Try the demo [here](#).

**GNN-Aided HLS Design Optimization**

*Undergraduate Intern*

**Sharc Labratory, Georgia Institute of Technology**

*Sep. 2021 - Ongoing*

## AWARDS AND HONORS

---

- Excellent Yunnan student scholarship
- 2nd Prize of student innovation project of Nankai University
- 2nd prize of Nankai University Challenge Cup (science and technology invention track)
- Honorable Mention of Mathematical Contest In Modeling, 2021

## SKILLS

---

- Languages: C++(advanced), Python(advanced), MATLAB, JavaScript, HTML/CSS, MySQL
- Tools: Pytorch, Jittor, Linux(Ubuntu), LaTeX, Raspberry Pi, Adobe suite, Office suite
- Fluent in English (TOFEL 106), Basic in Spanish, Chinese (Native).
